

Hi Tom,

Thank you for reviewing my application for the “Staff iOS Engineer (AI Native), Family AI lab” position at Life360.

I have been shipping iOS applications at startups for the last decade, and I am confident my skills can be plug and play for this position. Recently I have been maintaining OpenAI and Anthropic API integrations in Swift so that I can write and deliver best in class AI Native features on mobile.

I’m looking forward to telling you more over a phone call (206) 234-9019

Thank you,

Jon Vogel
